

More Care, Under One Roof.

We want you to feel like you're in good hands – because you are. At our Bellville rooms, we've quietly built something special: a full suite of extended diagnostic and multidisciplinary services, right there during your consultation. No extra trips. No waiting weeks. Just answers, faster.

These services are **integrated into your visit** when clinically indicated by your treating doctor – designed for patients with complex, ongoing, or multi-system health concerns.

DIAGNOSTIC & FUNCTIONAL TESTING

Point-of-Care Ultrasound (POCUS)

Focused bedside ultrasound performed *during* your consultation. Used for:

- Early pregnancy confirmation
- Basic abdominal assessments
- Targeted clinical evaluations

Supports real-time decisions. Formal radiology referrals arranged when deeper imaging is needed.

Spirometry (Lung Function)

A simple breathing test to assess & monitor lung health. Helps diagnose:

- Asthma
- COPD (Chronic Obstructive Pulmonary Disease)
- Exercise-related breathing concerns

May be repeated over time to monitor your treatment response.

Electrocardiogram (ECG)

A quick, non-invasive test recording your heart's electrical activity. Used to:

- Assess heart rhythm & rate
- Investigate chest pain, palpitations, dizziness
- Screen for cardiac conditions
- Baseline checks before treatments

Results reviewed & discussed with you. Referrals arranged if needed.

IN-HOUSE MULTIDISCIPLINARY CARE

Where clinically indicated, you may be referred to in-house specialists as part of your holistic care plan – all coordinated and discussed with you during your visit.

Audiology

Hearing assessments, hearing-related concerns & diagnostic testing

Expanding our Multidisciplinary Team soon

We are growing our in-house team of specialists to bring you even more comprehensive, coordinated care – all under one roof. Stay tuned for exciting updates.

COMING SOON

A Few Things to Know

- All services are offered based on **clinical need** and practitioner discretion
- Diagnostic tests may be **billed separately** from your consultation fee
- **Costs, indications & next steps** are always discussed with you in advance
- **Referrals are arranged** where additional investigation or specialist input is required

Your health deserves the full picture.

We're here to make sure every visit counts. Speak to your doctor about which of these services may be right for you – because comprehensive care shouldn't feel complicated.
